How is Fund Balance Reported?

- Assets plus Deferred Outflows of Resources less Liabilities less Deferred Inflows of Resources reported in Governmental Fund Types
 - “The extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent” (GASB #54, Para 5)

Components of Fund Balance

- ❑ Five categories
 - Nonspendable
 - Spendable
 - Restricted
 - Committed
 - Assigned
 - Unassigned

- ❑ Not all will always be present

Nonspendable Fund Balance

❑ Not in spendable form

- Cannot *ever* be spent
- Cannot *currently* be spent

❑ Legally or contractually required to be maintained intact

Spending Constraints

- ❑ Three categories
 - Restricted fund balance
 - Committed fund balance
 - Assigned fund balance

- ❑ No requirement that constraint be narrower than the purpose of the fund

Restricted Fund Balance

- ❑ Constraints enforceable by outside parties
 - Creditors
 - Grantors and contributors
 - Law or regulations of other governments
 - Constitutional provisions/enabling legislation

- ❑ Same as restricted net position

Committed Fund Balance

- ❑ Constraints imposed by government itself
 - Formal action to impose and remove
 - Highest level of decision-making authority
 - Action must be taken prior to the end of the reporting period

Assigned Fund Balance

- ❑ Intent to use for a specific purpose
 - Body or official delegated by governing body or governing body itself
 - Governing body's intentions not management's
 - Action taken before issuance of financial statements

- ❑ Never in excess of total fund balance less other components

Unassigned Fund Balance

- ❑ Residual balance reported in general fund
 - The use of some other fund type presumes that all of the resources reported in that fund are either restricted, committed, or assigned

- ❑ Positive balance only in general fund

- ❑ Deficit possible in any governmental fund

Summary of Fund Balance Components

Nonspendable	<i>Form or legal limitation</i>
Restricted	<i>Externally enforceable limitations</i>
Committed	<i>Self-imposed limitations</i>
Assigned	<i>Intended use</i>
Unassigned	<i>Residual</i>

What is the Basic Accounting Equation?

- Assets + Deferred Outflows of Resources = Liabilities + Deferred Inflows of Resources + Net Position (Fund Balance for governmental funds)

What are Deferred Outflows and Inflows of Resources?

- ❑ Deferred outflows of resources:
 - Consumption of fund balance by the government that is applicable to a future reporting period

- ❑ Deferred inflows of resources:
 - Acquisition of fund balance by the government that is applicable to a future reporting period.

Deferred Inflows of Resources

- Nonexchange Transactions
 - Imposed Nonexchange Transactions - result from assessments imposed on nongovernmental entities, including individuals, other than assessments on exchange transactions (for example, property taxes and fines)
 - Deferred inflows of resources when received or reported as receivable before:
 - The period for which property taxes are levied
 - The period when resources are required to be used or when use is first permitted for all other imposed nonexchange revenues in which the enabling legislation includes time requirements

Deferred Inflows of Resources

- Nonexchange Transactions
 - Government Mandated and Voluntary Nonexchange Transactions - occur when a government at one level provides resources to a government at another level and requires the recipient to use the resources for a specific purpose (for example, federal programs that state or local governments are mandated to perform) or result from legislative or contractual agreements, other than exchanges, entered into willingly by the parties to the agreement (for example, certain grants and private donations)
 - Resources received before eligibility requirements are met (excluding time requirements) should be reported as assets by the provider and as liabilities by the recipient
 - Resources received before time requirements are met (but all eligibility requirements met) should be reported as deferred outflows of resources by the provider and deferred inflows of resources by the recipient

Deferred Inflows of Resources

- Revenue Recognition in Governmental Funds
 - When an asset is recorded in governmental fund financial statements but the revenue is not available, the government should report a deferred inflow of resources until such time as the revenue becomes available.

- “Deferred” should be limited to items reports as deferred outflows of resources or deferred inflows of resources – use terms such as unearned or advances
